

CZERNY'S

Dear client, due to Brexit and work-related delays and complications during the Covid pandemic, shipping items outside the European community currently detects possible serious delays and additional expenses. It is important before bidding to be aware of the current situation as neither Czerny's nor our shippers are in any way responsible for any inconvenience. Please also note it is your responsibility to know if you can import the items you buy from us in your Country. Each Nation has its regulations, taxes, restrictions and in some cases it is necessary to obtain a license or a special permit to import weapons. Neither Czerny's or our shippers are in any way responsible for additional fees or documentation your Country requires to import your goods, we are not responsible for delays or if your importation is declined from your Country because you failed in providing the requested documentation or permits (in that case all the expenses are charged to the client).
